Education

Bachelor of Science in Computer Science, Arizona State University
May 2026

Experience

Software Engineering Intern

SkipCourse LLC
August 2025 – May 2026

- Refactored an AI assessment pipeline into a chunked RAG architecture using embeddings, vector similarity search, clustering, and LLM-based chunk evaluation.
- Integrated serverless microservices on Google Cloud with Cloud Functions Gen2, Firestore, Pub/Sub, and Vertex AI for asynchronous academic assessment and standards matching.

Experiential Learning Technology and Program Lead

University College, Arizona State University
January 2025 – present

- Created, redesigned, and maintained University College webpages, and mentored interns in Drupal and web development.
- Coordinated outreach for Elevate and ELI through event planning, tabling, and stakeholder collaboration.

Program Aide

University College, Arizona State University
January – December 2024

- Maintained University College websites in Drupal 8 and hosted information sessions promoting the Elevate platform.
- Collaborated with cross-functional teams on the ASU tutoring website's user experience and site architecture.

Selected projects

Harmonic Color Graph

Corpus-backed recommendations and grounded explanations, built on inspectable harmonic tools.

Typed tools · Grounding · Evaluation

ToneScope

A Windows guitar-effects workbench for selecting passages, comparing processing, and previewing reversible changes.

C++ · Faust · React

TruckerPath Dispatcher OS

A demo-first logistics product connecting dispatch workflows, explainable load ranking, and experiment planning.

Next.js · Load scoring · PM Copilot

Skills in practice

- AI systems: Python · LangGraph · Tool grounding. Harmonic Color Graph.
- Software: TypeScript · React · Next.js · FastAPI. System design.
- Audio systems: C++ · Faust · Signal inspection. ToneScope.
- Product: Workflow design · Scoring · Experiment planning. TruckerPath case study.
